(2020-2021)

Technical Skills

- React JS with TypeScript / Tailwind CSS
- Dart with Flutter
- PHP (with Laravel)
- NEST JS
- MySQL
- PostgreSQL
- Graphic Design
- UI/UX Design

Work Experience

Software Developer

2025 - Present

Institut Universitaire de la cote (IUC-Groups)

Logbessou, Douala

Developed a comprehensive mobile application serving as a self-service platform for streamlined lecturer information collection and real-time dissemination of timetables and task schedules. Engineered to facilitate seamless communication between academic departments and faculty members while implementing a robust media technology system for efficient management of IUC lecturer documents, significantly enhancing institutional operational efficiency.

Software Developer

2024 - 2025

Institut Universitaire de la cote (IUC-Groups)

Logbessou, Douala

I went for a 6months intervention and developed the EDEN mobile application for Douala Medical Diagnostics Platform (PDMD), transforming medical diagnostics through a unified platform that enhances doctor-patient communication. The solution enables secure access to test results, streamlines medical requests and payments, and equips healthcare providers with powerful analytical capabilities to drive data-informed decision making.

Certifications and Training

- Google Project Management by COURSERA
- Digital Fundamentals & Collaboration Certification LinkedIn Learning
- Strengthening Women's Participation in Political, Peace, Security, and Economic Institutions - YALI Network
